## Fall Semester 2000 Enrollment Report Summary

Northwestern Michigan College has had fairly steady enrollment since 1994, with a range of between a minus of about 0.5 percent to a plus of over 3 percent during that time. This year's enrollment was 4,075, which is a decrease of less than 0.25 percent from 1999. Credit hours of 37,408 and contact hours of 41,086 show similar consistencies with the largest decrease in contact hours of just over one percent this year. See page 4. NMC had a high enrollment of 4,698 in 1989.

Statistics of unemployment rates just out for July 2000 show northwest Lower Michigan at record lows. Charles McIntyre, in the October 1999 final report for the Michigan Community College Data and Evaluation Committee, stated, "When unemployment drops, other things being equal, enrollment drops." The lower unemployment rates for northwest Lower Michigan correspond with the lower enrollment.

The main campus in Traverse City showed a slight increase in enrollment and slight decreases in credit and contact hours. Cadillac enrollments showed the largest decrease in enrollment but increases in credit hours and contact hours. The increases may be attributed to the nursing interactive television course held in Cadillac. Total numbers in Cadillac this fall went from 218 to 190. Over 20 percent of Cadillac students also take courses at the main campus in Traverse City.

A comparison of state-wide enrollment changes in community colleges' credit hours and head count may be found on the web at <http://www.macrao.org/ccweekly.asp>.

The disciplines on the main campus with the largest increases in contact hours are Maritime with 13.48 percent, Science/Math with 1.96 percent, and Communications with 1.42 percent. See page 12. The disciplines on the main campus with the largest decreases in contact hours are Health Occupations with -16.01 percent, Technical with -14.95 percent, and Physical Education with -8.09 percent. See page 12.

TouchTone registration use showed a decrease this fall, down to 705 students from 853. This may be due to the implementation of Web registration, as this is the first Fall semester Web Registration has been in place. Totally, about 1,000 students used TouchTone and Web Registration. See page 5. This may not be the only means those students used for their registration process as many students continue to add and drop classes throughout the registration period.

The number of Grand Traverse county, in-district residents, decreased slightly, as did other counties in the state. The five-county service area showed a slight increase of over 0.5 percent. See chart on page 6.

The number of full-time students showed a slight increase, along with students taking one to five credits. Part-time students, taking from six to eleven credits, showed a decrease of over 4 percent. See chart on page 7.

The mean age of NMC students has dropped over one-and-a-half years since 1992 going from 27.8 to 26.06 years old. The number of dual enrolled students have remained steady since Fall 1997. See chart on page 9.

NMC continues to offer Flexible Learning Options through telecourses, internet telecourses, internet on-line courses, Interactive Television courses, and the Open-learning format. Overall, the number of students taking FLO classes has remained steady since last year, down from 2903 to 2804, a decrease of 3.41 percent. It is hard to show a meaningful comparison of FLO classes since not all courses in each format are offered each semester in the same format. The number of credit hours generated for classes in any FLO format from 1997 through 2000 are listed on page 20.

## TouchTone and Web Registration

### Fall Semester 2000

During the Fall semester 2000, the number of students who used TouchTone registration to add/drop classes was 705. This is down 17.35 percent compared to Fall 1999 when the number was 853. The number of classes added was 1286, which is down 24 percent compared to Fall 1999 when 1693 classes were added. The number of classes dropped was 391 which is down 4.17 percent compared to Fall 1999 when 408 classes were dropped.

### TouchTone Registration

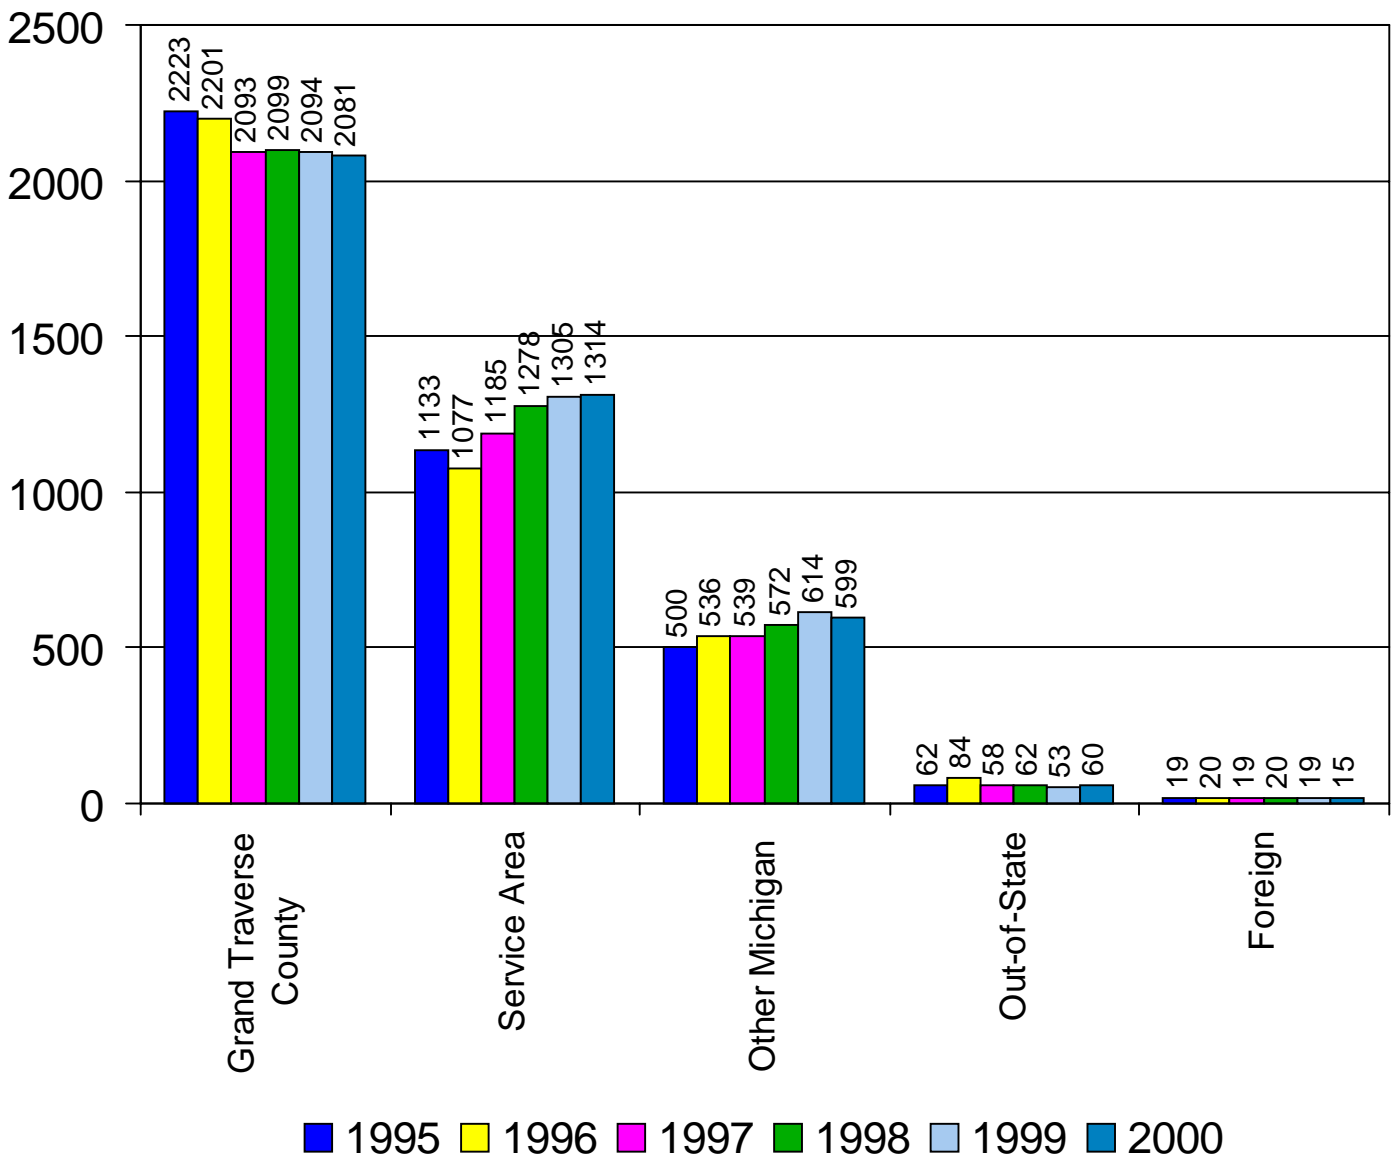

Web registration was implemented during Spring 2000 registration but was not widely advertised. Thirty-five students discovered the service and enrolled, added, and dropped classes. During the summer, 64 students used Web registration to enroll with 66 classes added and 47 classes dropped. Although the web activity for fall was not high, 281 students enrolled and 490 classes were added with 244 classes dropped. In addition to Web Registration information being available in the Spring/Summer 2001 Schedule of Classes, an effort will be made to make Web Registration more visible with assistance available for student the first week of Spring registration.

TouchTone registration was available from 7 a.m. to 10 p.m. during the registration dates. Web registration is available 24 hours a day during the registration dates.
