What to do if a student tests positive for COVID-19

A student tells employee he/she tested positive or NMC receives notification from the county health department.

The student or employee notifies either NMC Health Services, VP for Student Services or Dean of Students. Using the Red Flag alert is preferred.

The county health department will conduct contract tracing, determine the level of contact and the individual(s) who need to be notified of possible exposure.

NMC Health Services will advise student and employee on the appropriate actions based on level of contact.

Student will be advised not to come to campus for 10 days since symptoms first appeared and 24 hours with no fever without medication.

Student will be advised to contact the instructor in regards to class absence.

NMC executive leadership will coordinate with the county health department to determine the level of communication required based on case-specific information, HIPAA and Cleary Act.

NMC Health Services will notify the NMC Director of Facilities of any impacted area(s) on campus for additional cleaning needed.
