Tips & Tricks for Registration

**Searching a Specific Science Class w/Lab**

If you are searching for a specific science class and enter the department and the number, you only get the lecture, not the lab. In order to get both the lecture and lab, you can enter % after the course number; e.g.,

**Subject: Biology  Course Number: 106%**

Once Search is commenced, the result is the lecture followed by the lab connected to it.
**Group 1 Humanities with ENG Lit Search in Self-Service**

**NEW!** You can now search for **ALL Humanities group 1, including ENG Literature** classes by selecting the following information in the Advanced Search (also see Screen Shot below).

Select in this field:
**Division/Group 1 or 2 - Humanities Gr1 with ENG Lit**

**Searching for ENG111 of ENG111 + 11**

Enter English in the Subject field.
Enter %11 in the Course Number field and click Search.
You will see all the ENG 111s and ENG 11s paired appropriately. They will be followed by the ENG 111s not paired with ENG 11s. 
(see below)

Registering for MTH 08 or MTH 23
Are you struggling with getting no classes when you search for MTH 08 or 23 in Self Service? If you enter a space in front of the 08 or the 23, you will bring up the classes.

P.S. This works when entering MTH 08 and MTH 23 in Plans as well.
