Betsy Williams
231.995.2018
ewilliams@nmc.edu

Lean Manufacturing Practitioner will develop an individual's capability to contribute to an organization's lean transformation. Participants will learn key concepts of technical lean tools through hands – on experience at participating host locations.

Lean Manufacturing Simulation

- Focus on the lean concepts of pull production, cellular flow, and single-piece flow

5S Workplace Organization

- Apply the concepts of sort, set-in-order, and shine
- Develop process to standardize and sustain

Standard work

- Identify elements of standardized work
- Define and document the standard work sequence

Kanban and Pull Production

- Develop supermarkets, Kanban, and replenishment systems

Problem Solving

- Develop a succinct and effective problem statement
- Conduct root cause analysis
- Develop countermeasures

Kevin Olds, Senior Business Advisor

- Bachelor's Degree (B.A.) in Business Administration, Management (Florida Institute of Technology)
- Certified Lean Six Sigma Black Belt (Commander, Naval Air Forces)
- United States Navy Leadership Training
